

Looking for a better way!

The value of Nordic Backup!

Data is growing exponentially due to widespread use of the Internet, email and media-rich software. Retrieval of data from a crashed hard drive is often extremely costly, and there is NO GUARANTEE of success! Your business data goes hand-in-hand with your business operations. The loss of such data, or even their temporary inaccessibility, may threaten your hard-earned competitive position.

Conventional approaches to backup are not good enough.

Examples of potential problems: High failure rates during restoration • Difficulty in detecting problems of backup performing restoration • High maintenance costs • Reduced flexibility for backup caused by fixed capacity per backup media • Increased likelihood of occurrence from negligence-induced problems (e.g. lost or misplaced data)

What makes Nordic Backup the ultimate backup solution?

- *Four components with robust features* - Secure Offsite Backup Servers, Advanced Backup Client, Simple Backup Client, Redundant Secure Data Centers.
- *Continuous Data Protection* - Captures every version of a saved file providing a highly dependable means of real-time, continuous data protection for servers, desktops and laptops effortlessly and transparently.
- *Supports all platforms and common databases* - including Windows, Mac, Linux, UNIX, NAS devices, VMware, Hyper-V, MS Exchange, MS SQL, Lotus Notes/Domino, Oracle, and MySQL
- *Backup individual mail data* - including email, calendar and contact list.
- *Unlimited protection and long term retention* - all data is protected against virus, theft, environmental impact, hardware failure and accidental deletion. We also provide longer retention of stored data than most online backup providers.
